## 1 Step-by-step walkthrough

This is how we were able to run the VM on our OWN built kernel.

1. Type

```
mkdir group7
```

in the

```
/scratch/fall2018
```

folder on the os2 server.

2. Move into the group 7 directory by typing

```
cd group7
```

3. In this directory, obtain the linux-yocto by typing

```
git clone
```

**2 Proposed Solution**

**3 Limitations**

**4 Conclusion**
